Applications and Useful Information:

Product for diluting synthetic and oil-synthetic enamels.

In addition to good solvent power, its slow evaporation gives the paint perfect spreading and shine.

It can also be used to clean surfaces before painting, to clean painting equipment, for DIY, etc.

Dilute the enamel to the desired viscosity for the chosen application. Thicker for brush or roller, more liquid for spray application. Approximately between 5% and 15 %, unless there are different indications printed on the paint can.

Not suitable for use on car bodywork.
