Applications and Useful Information:

Having quick evaporation, this product is specific for diluting catalyzed polyurethane paints. It is also suitable for primer paints or interior parts of furniture.
Under favorable environmental conditions it can also be used for medium-quality paint finishes, possibly by adding Retardant B.
Dilute the paint to the desired viscosity for the chosen application: thicker for brush or roller, more liquid for spray application.

The above information is provided based on our theoretical and practical knowledge. The company, however, does not assume any liability as the conditions of use and application are not subject to the control of OV SpA.
