

Technical Data Sheet:

Thinner for TRAFFIC ISLAND

| | | | |
|-------------------|--------------------|--------------------|-------------------------|
| Code: 0080 | Ref.: ST080 | Revision: 2 | Date: 19/11/2018 |
|-------------------|--------------------|--------------------|-------------------------|

Product Characteristics:

Thinner for paints used in road surface marking.

Formats: Drums 1000 lt and Cans 25 lt.

Technical specifications:

| CHARACTERISTIC | UM | VALUE | METHOD | TOLERANCE |
|-----------------|--------------------|-------|--------------------|-----------|
| Physical state | Liquid | | Visual | // |
| Color | Colorless clear | | Visual | // |
| Density at 20°C | Kg/dm ³ | 0.844 | Met. Int. ISTR. 44 | ± 0.02 |
| Flash point | °C | < 0 | Met. Int. ISTR. 53 | Typical |

Applications and Useful Information:

Specially designed for diluting enamels used in road surface marking.

It evaporates very quickly, so that the paint is dry and walkable in a very short time, and most importantly without melting the asphalt surface.

Needless to say, it can also be used on garage concrete, wood, iron, etc.

Thin the paint, leaving it a little thick, so that the paint has more thickness.

It is also a great product for cleaning equipment.

The above information is provided based on our theoretical and practical knowledge. The company, however, does not assume any liability as the conditions of use and application are not subject to the control of OV SpA.
